Check out the outcomes of DIGITAL ACCESS!

“DIGITAL ACCESS: Digital Skills for People Living in the 3rd Age - Effective Digital Access to Public Services” has developed a set of informative and educational products which support people living in the third age in their adaptation to the digital world and ensure that they can easily access the right services, take advantage of the benefits the Internet offers and feel confident for using online tools to manage their health and life quality.

The DIGITAL ACCESS products are available in 5 languages – English, Bulgarian, Spanish, Czech and Greek, on the online platform of the project www.digital-3rd-age.eu.

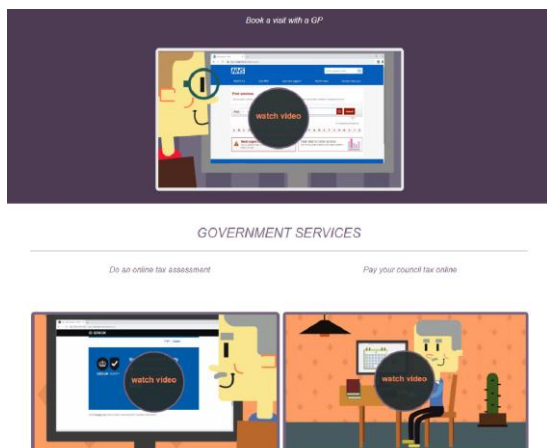

ONLINE PUBLIC SERVICES ROADMAPS

The Roadmaps provide information on the most relevant online public services in 5 EU countries – the UK, Bulgaria, Spain, Greece and the Czech Republic. Each Roadmap includes information on the skills and means needed to access the public services, security risks and tips related to each service as well as the benefits they offer to people who use them. Different services from each Roadmap are also developed as demonstrational video materials within the Digital Assistance Tool.

DIGITAL ASSISTANCE TOOL

The Digital Assistance Tool is an instrument that supports the digital inclusion of people living in the third age. It contains video materials from the 5 partner countries which demonstrate in practice the access and use of different online public services. The Tool is developed as animation scenarios with people accessing actual public services online.

TRAINING PROGRAMME

The Training programme is designed to develop the proper digital skills necessary to effective digital access to public services and to improve the digital knowledge of elderly learners. The programme is intended to develop and improve basic digital skills, specific skills for access to online services and skills related to online safety, researching specific information, etc. The modules of the Training programme are divided into 3 levels – beginners, intermediate and advanced, and they are available in English, Bulgarian, Spanish, Czech and Greek.
